

How to play CDs from an element 2nd gen device through a CD drive

Applicable models: element X2, element M2, element i2

Firmware of device: 1.0.7 or newer.

CD drives: We tested the following CD drives which are compatible with the element devices. Dell DW316, Lenovo DB85, Pioneer DVR-XU01C、thinkplus TX801. We recommend you to use the CD drives which maximum current is not higher than 1.5A.

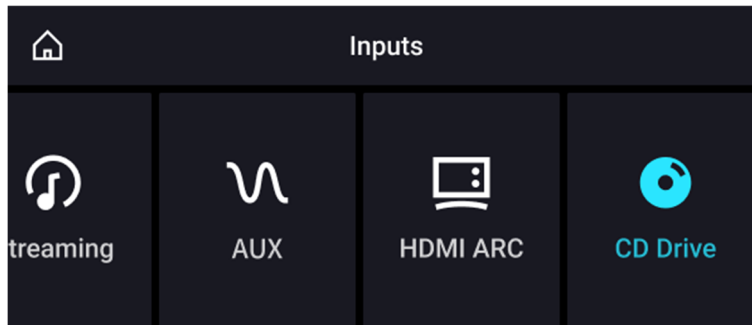

Compatible CDs: MQA-CD and regular Audio CD. Not support SACD, DVD and Blue-Ray Discs.

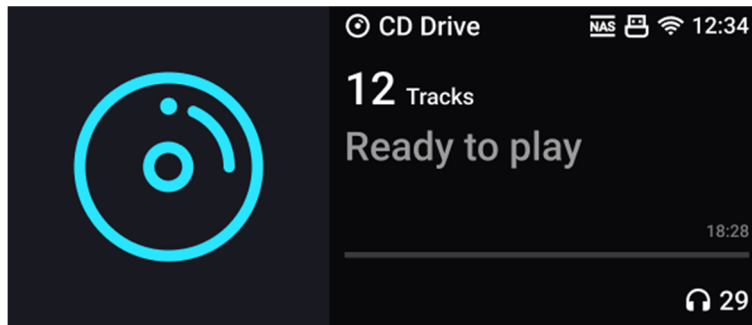

How to play a CD from element device:

1. Swipe left on the element device display, tap on "Inputs", find and tap on icon "CD drive".

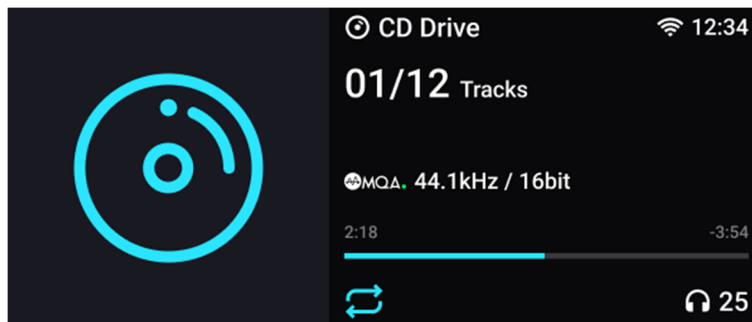

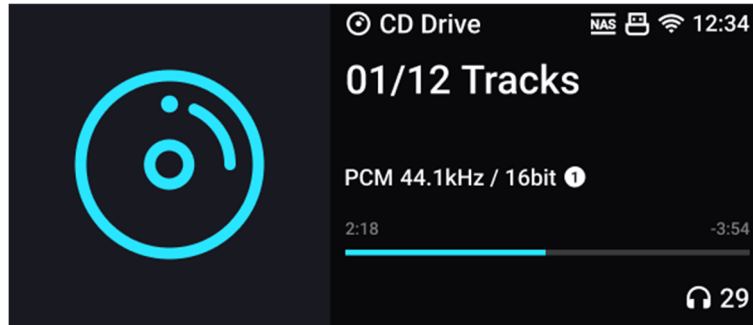

2. Connect your CD drive to the USB type C port of the element device. If the CD drive offers a USB-A plug, you can use a type C OTG adapter to convert the connector.

3. Put an audio CD into the CD drive, the element device will read the CD automatically. After there is text "Ready for play" shown on the device display, tap on the Play button to start playing the CD.

When you are playing an MQA-CD, there will be an MQA logo and the unfolded sampling rate showing on the device display. When a regular CD is playing, the PCM sampling rate will be shown on the device display.

4. Playback control

Playback touch control area:

Single tap on the "Play/Pause" key to start, pause or resume playing.

Hold the "Play/Pause" key to stop playing this CD.

Tap on the "Previous" or "Next" key to skip to the previous or next track.

IR remote control:

Tap on the "Play/Pause" key to start, pause or resume playing.

Tap on the "Previous" or "Next" key to skip to the previous or next track.

MA Remote App:

Tap on the "Play/Pause" key to start, pause or resume playing.

Tap on the "Previous" or "Next" key to skip to the previous or next track.

Tap on the "Repeat" icon to switch between "Track on repeat, Queue on repeat and disable repeat".

Tap on the "Shuffle" icon to enable or disable shuffle playback.

When the CD is playing, the specific track can be played from Queue.
